---------------------	--------------------	-------------	--------------------------------	-----	------------------------------	-----

The Auburn Way South (SR 164) Corridor Improvement project is approximately 0.14 miles in length, from Fir ST SE to Hemlock ST SE. This project will construct a new 5 lane section of roadway with illumination. There will be 2 through lanes in each direction and a center turn-lane with a U-turn/Wedge and transit pullouts at Hemlock ST SE. There will also be 10-foot wide sidewalks and storm drainage improvements.

Associated with the project, a new traffic signal will be constructed at the intersection of Hemlock ST SE and Auburn Way South (SR 164) with ADA compliant ramps, push buttons, and signal heads.
